**Bulletin No:** PB346

**Issue Date:** 4-9-2014

**Effective:** 4-25-2014

**Product Description:**

808 Desoldering Tool and Kit

**Part No:**

808-KIT/P

**Specification:**

**DISCONTINUED**

**Comments:**

The HAKKO 808 Desoldering Tool and Kit has been discontinued. The HAKKO FR-300 Desoldering Tool will be introduced April 29, 2014 as a direct and improved replacement.

The HAKKO 808 Desoldering Tool was introduced to the market over 20 years ago and has been a favorite light duty and low cost desoldering tool for field technicians and electronics repair shops. The HAKKO 808 was originally available as the tool alone, but with the growing demand for the tool to come in a complete tool carrying case, the stand-alone version was discontinued in November 2001.

With the evolution of electronics over the last two decades, the 808 Desoldering Tool clearly needed to be improved to meet the needs for a better performing, lighter weight, and more durable desoldering tool.

HAKKO guarantees replacement part supply for products for a period of three (3) years, and consumable parts supply for a period of five (5) years after the date of discontinuation. After the applicable guarantee periods, replacement and consumable parts may only be available while supplies last.
