PRODUCT BULLETIN

Bulletin No: PB332

Issue Date: 11-30-2012

Effective: SN: FR1012B-0976

Product Description:

Improved Board Holder for FR-1012B

Part No:

FR1012B-01,FR1012B-02

Specification:

UNCHANGED

Comment:

The HAKKO FR-1012B IR Preheater has been improved by upgrading the Y-axis rails of the board holder to the current rail type used by the HAKKO FR-870 IR Preheater. This rail system provide for smoother movement of the rails when adjusting the board holder to fit your PCB.

There is no change to the performance or operating specifications of the product as a result of this change.

NOTE: The new board holders are NOT compatible with older extended Y-axis (PN: 999-225) and additional Clip Rail (PN: 999-226) assemblies from older FR-1012 and FR-1012B units.
