Description/Title:

Debris Screen for HAKKO FA-430 Duct Kit Nozzles

Part No:
999-700

Specification:

| | |
|----------------------|--|
| Compatibility | Fits B3622 and B3623 Nozzles (Nozzle are part of C1571 and C1572 Duct Kits) |
| Material | Hot dipped galvanized steel wire – 23 AWG |
| Dimensions | Approx. 60 mm diameter x 1.1 mm thick |
| Weight | Approx. 2 g |
| ESD Safe | Yes |

Comments:

This new improved debris screen is made from a durable steel wire and has a longer service life compared to the standard netting (PN: B3625) that comes with the HAKKO FA-430 Duct Kits (PNs: C1571 and C1572).

The debris screen is easy to install inside the nozzle and does not affect the filtration performance of the HAKKO FA-430 Fume Extraction System.
