PRODUCT BULLETIN

Bulletin No: PB359

Issue Date: 3-31-2015

Effective: 4-30-2015

Product Description:

HAKKO FR-870 2-Bank IR Preheater

Part No:

FR870-04

Specification:

DISCONTINUED

Comments:

The HAKKO FR-870 2-Bank IR Preheater has been discontinued. The HAKKO FR-870B 2-Bank IR Preheater will be available on April 27, 2015 as a direct and improved replacement.

The HAKKO FR-870 was introduced on May 10, 2011 and quickly grew to be a very popular and powerful PCB assembly preheater with great performance and control. Building on the feedback we received from customers of both the HAKKO FR-870 and the much older HAKKO FR-1012B IR Preheaters, we incorporated those demands as improvements in the HAKKO FR-872 4-Bank IR Preheater which was released on August 5, 2014.

Since HAKKO is always looking to improve our products to meet the needs of our customers, it was an obvious step for us to integrate those great features of the FR-872 into an updated version of the FR-870, which namely include new software allowing you to control the ramp rate at 1, 2, or 3 degrees Celsius per second when you are in one of the two thermocouple modes, and making use of the new high efficiency carbon filament lamps.

HAKKO guarantees a replacement part supply for a period of three (3) years, and a consumable parts supply for a period of five (5) years after the date of discontinuation of a product. After applicable guarantee periods, replacement and consumable parts may only be available while supplies last. No orders will be accepted for the part numbers listed herein once out of stock.
