¹ – Measured with C5027 Board Holder

Contents:

Part No.	Description
C5028	Handpiece Fixture M
--	O-Ring
888-085	Hex Wrench (6 mm)
B5139	Component Tray
--	User Manual

Comments:

The HAKKO C5028 Handpiece Fixture is designed for use with the HAKKO FR-810 and FR-810B Hot Air Rework Stations, and the HAKKO FR-811 SMD Rework System. The C5028 handpiece fixture provides a small but stable footprint for users with limited space and is ideal for use with other HAKKO preheaters. The fixture includes an attachment point for the HAKKO C5027 Board Holder, a one-touch slide adjustment as well as a knob for fine adjustment in the y-axis. The swing arm and adjustable collar of the fixture allows for easy positioning of the handpiece directly above the component to be reworked and also allows the rotation of the handpiece to adjust the theta angle of the nozzle in relation to the component. A hand-held component tray is also included.
