Comments:

New HAKKO C5045 and C5046 nozzle quick changer, available as of February 22, 2019, are designed for use with Hakko desoldering handpieces equipped with quick-change mechanism.

Three separate ports allow user to store different shape nozzles and be able to change from nozzle to nozzle with a simple twist. Special positioning jigs are also available for oval shaped nozzles, allowing user to set the preferred orientation of the nozzles.
