Bulletin No: PB221

Issue Date: July 18, 2005

Product:

Pan and Tilt Mirror for FR1418

Part No:

222-529

Comments:

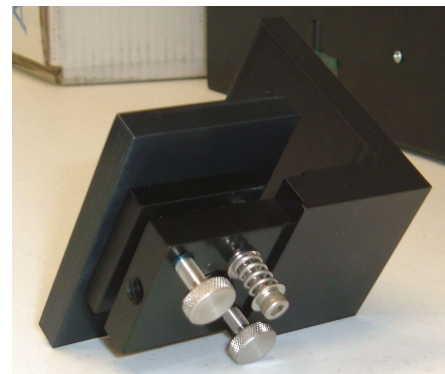

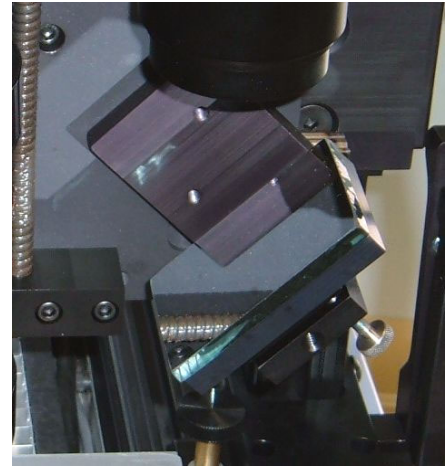

The Pan and Tilt Mirror provides a movable viewing area of the split image on any of the FR-1418 BGA Rework Systems. This is especially useful when using the FR-1418 with leaded components. When the lens magnification is increased the Pan and Tilt Mirror allows you to “pan” around the outside edge of the component to verify lead to pad orientation. The Pan and Tilt Mirror can be installed on new machines or retro-fitted on existing machines.

Available:

July 05, 2005

List Price:

\$583.37

For pricing information, please contact your local American Hakko representative or our customer service department at (661) 294-0090.
