Effective: 3-31-2015

Product Description:

HAKKO DASH Soldering Irons

Part No:

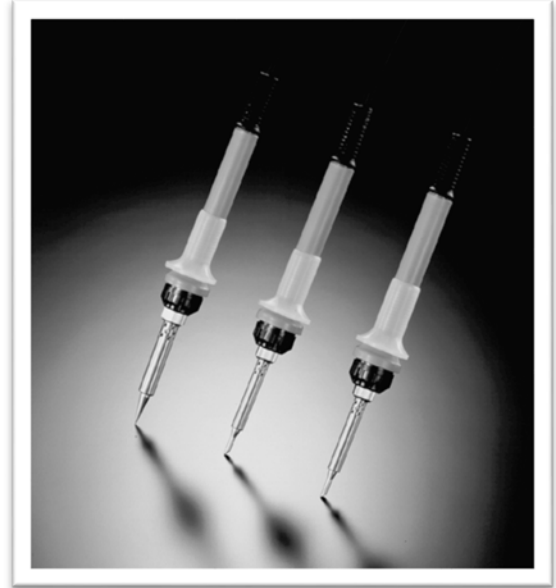

N452JN-V12, N453JN-V12, N454JN-V12

N452JN-V12/P, N453JN-V12/P, N454JN-V12/P

N454JN-US01

Specification:

DISCONTINUED

Comments:

The HAKKO DASH soldering irons have long been a standard for an entry level soldering iron that uses HAKKO's renowned ceramic heating technology. With advances made in ceramic heaters and easy to change tips over the last 30+ years, it was time to update the DASH design.

On March 17, 2015, the HAKKO FX-650 will be available for purchase which is an updated design of the DASH soldering iron. It incorporates a new, efficient ceramic heating element, and uses new T34 Series one-piece tips that are very simple to replace. The HAKKO FX-650 also comes with a basic soldering iron stand, and a sample of lead-free solder so you are ready to go right out of the box.

The DASH soldering iron will be discontinued at the end of this month, or once the remaining supply has been exhausted.

HAKKO guarantees a replacement part supply for a period of three (3) years, and a consumable parts supply for a period of five (5) years after the date of discontinuation of a product. After the applicable guarantee periods, replacement and consumable parts may only be available while supplies last. No orders will be accepted for the part numbers listed herein once out of stock.
