# **DPF-300** PCB DEPANELING SYSTEM

The **DPF-300** is a manual router table for depaneling PCBs from a panel or multiblock. A portable depaneling system providing the same performance and quality of a high-end router machine, with no programming required, at a fraction of the cost compared to other machines.

#### Safety

The shape of the interchangeable guide rail (PATENTED) assists the operator to safely place and maneuver the PCBs until the cut is completed. This prevents damage to the PCB should the operator insert the wrong size guide rail that does not match perfectly with the geometry and size of the panel slot.

#### Vacuum & Filter System

A powerful vacuum system is mounted directly under the table top, and a vacuum hose connected at the guide rail removes the PCB dust at the source for a clean and healthy work environment.

The fine dust particles are collected by a polyester filter cartridge that is easy to access and clean.

O SPECIFICATIONS	
Power Consumption	1 kW
Voltage	115V / 60Hz
Weight	161 lb. / 73 kg
Decibels	80 dB(A) <u>+</u> 3 dB(A)
Motor Spindle Power	0.27 kW
Micro-spindle Speed	24,000 RPM Max.
Dimensions (W x H x D)	25 x 28 x 37 in. / 64 x 70 x 95 cm
PCB Characteristics	
Thickness	Max. 4 mm
Slot Length	Min. 11 mm
Slot Width	1.5 - 2.5 mm
PCB Material	FR4 / CCL / CEM / Aluminum*

\* For aluminum depaneling, contact American Hakko Products, Inc. for the milling bit specifications.

## ATX Intelligent Torque Drivers ATX 12, 30 & 50

The latest tools from CHP are the **ATX 12, 30 & 50 Intelligent Torque Drivers.** These premium non-slip grip drivers work with the ATX Intelligent Torque Controller to calculate torque and angle. These transducer drivers have an LED status indicator ring, use a 1/4" hex bit, a torque range of 2.4 to 50 (kgf-cm) with a max speed of up to 2000 rpm.

The drivers feature an ergonomic grip design that is lightweight and ESD safe for electronics assembly. The drivers also feature an integrated, intensityadjustable white LED work light, user-defined status indicator light, easy to operate rotation direction selector, and a user-programmable trigger system that allows you to define the trigger type as push, lever, or both and also define the start and stop sensitivity.

SPECIFICATIONS			
Model	ATX-12	ATX-30	ATX-50
Torque Range	2.08 - 10.41 lbf-in. / 2.4 - 12 kgf-cm	5.20 - 26.03 lbf-in. / 6.0 - 30 kgf-cm	8.67 - 43.39 lbf-in. / 10 - 50 kgf-cm

## ATX Controllers SINGLE & DUAL-PORT INTELLIGENT TORQUE CONTROLLERS

The **ATX-P1 & ATX-P2 Single & Dual Port Intelligent Torque Controllers** are a 10-inch LCD touchscreen controller for the CHP ATX-12, 30, and 50 electric torque drivers. The controller is LED backlit and is available in a 1 or 2 port model for powering and controlling the ATX torque drivers. The large touchscreen interface allows the user to easily adjust the settings on the torque drivers for superior torque control.

## **Electric Torque Screwdrivers** BRUSHLESS

### STANDARD SERIES

The ideal solution for your assembly process, brushless screwdrivers eliminate down time from carbon brush replacement. Also suited for clean room applications.

- High performance brushless motor
- Low maintenance, no carbon dust
- Full auto shut-off
- Stepless speed control
- ESD Safe

AT-6500B

# Cutters STANDARD & ESD SAFE

**CHP Precision Cutters** are stamped from 2.0 – 5.0 mm carbon steel and then precision ground to exact specifications. The steel is heat treated to harden the tool for longer tool life. The surfaces are parkerized to prevent glare from distracting the operator. The sharp blades and carefully matched surfaces allow accurate cutting with less force.

MICRO CUTTERS SPECIFICATIONS						
Part No.	Description	Cut	Clip	Handle		
TR-20-M	The small head makes this an excellent cutter for work in tight spaces. 20 AWG max cut.	Flush	-A	-D		
TR-20-50-M	Same as TR-20-M but head is bent 50° to reach difficult areas. 22 AWG max cut.	Flush	-A	-D		
TR-20-SM	Rounded outside edges to reduce nicking to adjacent components and leads. 20 AWG max cut.	Flush	-A	-D		
TR-20-TM	Reverse cut head is angled to 50°. Special design for cutting IC leads. 22 AWG max cut.	Reverse		-D		
TR-25-P	Stronger version of TR-20-M. 18 AWG max cut.	Flush	-A	-D		

NOTE: Hand tools ending in "-D" have ESD safe gray dissipative handles. Cutters with an "-A" designation may be ordered with a safety clip.

NOTE: Hand tools ending in "-D" have ESD safe gray dissipative handles. Cutters with an "-A" designation may be ordered with a safety clip.

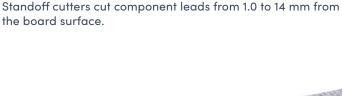

# Lead Forming

These tools are suitable for the pre-forming or cutting of a wide range of electronic components, combining the operations when necessary. All the tools in this series are made from carbon steel and are subjected to heat treatment to strengthen the tool for longer life. Tools are available for cutting axial and radial leaded components, flatpack ICs and transistors.

#### SPECIFICATIONS

$\sim$		
	Part No.	Description
	PNR-30-D	Forms a "C" shape standoff for axial & radial leads. Dissipative.
	PNR-5000-D	Cuts the lead & forms a "C" shape standoff for axial & radial leaded components. Height of component from board is adjustable from 4-16 mm. Dissipative.
	PTR-30-C-D	Pliers that forms the component wire in a C shape and cuts off the residual part.
	PTR-30-L-D	Cuts the lead & forms an "L" shape standoff for radial leaded components. Dissipative.
	TP-5000-15-D	Lead termination tool, cuts & clinches lead for 30°. Dissipative.

NOTE: Hand tools ending in "-D" have ESD safe gray dissipative handles.

# **Shears STANDARD**

The CHP series of shears are made-up of various single and multi-use tools. All the tools in this series are made from carbon steel and are subjected to heat treatment to strengthen the tool for longer life. The two parts of the tools are joined by carefully ground holes and surfaces, enabling precise movement.

#### SPECIFICATIONS

-	/	
	Part No.	Description
	CS-30	18.5 mm long shears. 16 AWG max cut
	CS-30-X	Combination tool, pliers & shears Max cut 16 AWG
	CS-30-XZ	Three function tool: Screwdriver, soldering tip removal & 5.5 mm long shears. Max cut 14 AWG
	CSP-30-3	40 mm long straight heavy-duty shear. Max cut 000 AWG

# **Depaneling Tools**

A tool designed to remove a single PCB from a multiple circuit board panel. The shearing action will eliminate delamination of the board material. These tools are made from carbon steel and are subjected to heat treatment to strengthen the tool for long life.

## Wire & Cable Strippers STANDARD & ESD SAFE

The CHP series of wire strippers offers a wide selection of wire stripping options. Self-adjusting wire strippers and fixed, precision ground strippers are made from heat treated carbon steel. Simple pull action wire strippers combine reliability with exceptionally fast use.

SPECIFICA	TIONS	
Part No.	Description	Handle
DP-15-N	1.5 mm wide head & 3.0 mm isthmus (tab) cut	-D
DP-20-N	2.0 mm wide head & 3.0 mm isthmus (tab) cut	-D
DP-23-N	2.3 mm wide head & 3.0 mm isthmus (tab) cut	-D
DP-24-N	2.4 mm wide head & 3.0 mm isthmus (tab) cut	-D
DP-25-N	2.5 mm wide head & 3.0 mm isthmus (tab) cut	-D

NOTE: Hand tools ending in "-D" have ESD safe gray dissipative handles.

The series of cable stripping tools will strip small coaxial cables (5-6 mm) and round cables with diameters between 4 and 50 mm. The cable strippers are fitted with an adjustable internal blade for an accurate cutting depth. A simple twist and pull action strips the sleeve and allows for easy removal.

# PN-2001 **Pliers STANDARD & ESD SAFE**

The CHP line has an extensive assortment of pliers for any need. The CHP pliers are sheared from carbon steel and then precision ground to exact specifications. The steel is heat treated to harden the tool for longer tool life. Pliers are available with short or long nose, straight or angled, serrated or smooth jaws, and fine or flat nose at 3 mm th Heavy-duty pliers made from 5 mm steel are also availab

# **Specialty Pliers STANDARD**

Micro and thin pliers are available for working with delig parts and can access narrow and dense areas. Round n pliers form components without damaging the leads.

107-SA

# **Tweezers**

Each **CHP Precision Tweezer** is manufactured with high quality stainless, non-magnetic, anti-acidic steels in a wide variety of tip shapes. Ideal for delicate, precision assembly.

SPECIFI	CATIONS	
Part No.	Description	
0-SA	Fine point tweezer, general purpose electronic tweezer, 120 mm	
00-SA	Fine point tweezer, stronger than 0-SA, 120 mm	
00B-SA	Fine point tweezer with serrated grip, 120 mm	00-SA
00D-SA	Fine point tweezer with serrated grip and tip, 120 mm	
OC11-SA	Fine point tweezer, smaller than 0-SA, 110 mm	
1-SA	Sharp point tweezer, smaller than 0-SA, 120 mm	
102-SA	Flat tip tweezer 2.2 mm wide, tips are angled to $30^\circ$ to easily handle chip components, 120 mm	1-SA
104-SA	Tweezers for handling of SMD components. 120 mm	
105-SA	Flat tip curved tweezer 2.6 mm wide, for handling SOT packages, 120 mm	
106-SA	Tweezers for handling of SMD components. Wide flat curved tip. 120 mm	CAR South Fr
107-SA	Flat tip tweezer, tip is angled to $30^\circ\text{to}$ handle chip components, 120 mm	106-SA
110-SA	Flat tip tweezer, tip is angled to almost $90^\circ$ to handle chip components, 120 $\mbox{mm}$	100-34
2-SA	Fine point thin tapered tweezer, 120 mm	
231-SA	Fine point tweezer, with serrated tip, 120 mm	WP Suttantia
2A-SA	Round point tweezer, 120 mm	2A-S
3-SA	Very fine point tweezer, 120 mm	
3C-SA	Very fine point tweezer, 110 mm	
4-SA	Very fine point tapered tweezer, 110 mm	. 8
5-SA	Very fine point thin tapered tweezer, 110 mm	SP Cathing
5B-SA	Tweezers with very fine and sharp tips, ideal for SMD applications; tips bent at $40^\circ$ for a better visual of the work area. 110 mm	Gr
7-SA	Very fine point curved tweezer, 120 mm	
7A-SA	Fine point curved tweezer, 120 mm	
7E-SA	Very fine point tweezers with flat, bent tips for easier grip in high density areas. 120 mm	
AA-SA	Fine point tapered tweezer, 130 mm	
F-SA	Rounded flat point tweezer, 120 mm	
SS-SA	Very fine point tweezers with long, thin handles. Ideal for operating close to heat sources. 140 mm
